DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Nagano (6014359). Nagano discloses a laser apparatus **Fig. 5A** comprising a laser **1** that emits light that is substantially linearly polarized; and a quarter wave retarder plate **4**, disposed with respect to the laser **1** so that the emitted laser light passes through the quarter wave retarder plate **4** prior to transmission of the emitted laser light through the optical transmission system **6**, the quarter wave retarder plate **4** causing the emitted laser light to become circularly polarized with a predefined handedness; wherein the quarter wave retarder plate **4** is also disposed so that light reflected by the optical

transmission system **6** back towards the laser passes through the quarter wave plate **4** causing the reflected light to become linearly polarized with a polarization that is orthogonal to the emitted laser light emitted by the laser **1**, **see col. 3, lines 8-40 and col. 6, line 44-col. 7, line 21.**

Regarding claim 2, Nagano discloses a lens **5** disposed between the laser **1** and the optical transmission system **6**, wherein the quarter wave retarder plate **4** is disposed between the laser **1** and the lens **5**.

Regarding claims 3-6, Nagano discloses a linear polarizer **3** disposed between the laser **1** and the quarter wave retarder plate **4**, wherein the linear polarizer **3** is adjacent a surface of the quarter wave retarder plate **4**.

Regarding claim 7, Nagano discloses a hermetically sealed housing in which the laser is mounted, the housing having a window through which the emitted laser light is transmitted; wherein the quarter wave retarder plate is disposed to form part of the housing, **see col. 7, line 52-col. 8, line 3.**

Regarding claims 8-9, 11-13, see rejection of claims 3-6 above.

Regarding claims 10 and 14, see rejection of claim 2 above.

Regarding claim 15-23, see corresponding rejections above.
